

Growing Forward 2

A federal-provincial-territorial initiative

Programs for Alberta Animal Health Professionals

Growing Markets. Strengthening Competitiveness.

Animal Health Biosecurity Delivery Agent

The purpose of the program is to create awareness, educate and train individuals, determine risks and implement mitigations on biosecurity and disease risk management through Delivery Agents (i.e. industry organizations, farm service providers, rural municipalities, Metis settlements and First Nations) located in Alberta.

Animal Health Biosecurity Producer

This program helps Alberta producers assess, determine and reduce biosecurity risks for disease in their operations through the implementation of robust biosecurity practices.

Food Safety Systems Delivery Agent

The purpose of the program is to help provincial delivery agents to implement recognized On-Farm Food Safety Programs and trainers to develop and implement food safety related training programs.

Livestock Welfare Delivery Agent

This program enables the adoption of nationally applicable livestock welfare best practices and technologies to enhance productive capacity and maintain social license for agri-food industries in Alberta.

Livestock Welfare Processor

The purpose of this program is to help meat processors improve animal handling and ensure humane slaughter at provincially or federally licensed meat and poultry facilities.

Livestock Welfare Producer

This program will provide livestock producers help to adopt production practices that enhance humane animal care, enabling the livestock industry to meet emerging consumer expectations for the care and handling of livestock, thereby allowing Alberta's livestock industry to increase its competitiveness and sustainability.
